

Online Job Portal System

Project Report

By

ACKNOWLEDGEMENT

I would like to thank my Major Professor, XYZ for believing in me, my capabilities and keeping his faith on me that I would be able to finish the project on time. His constant guidance, encouragement and valuable feedback led to the successful completion of this project. I extend my heartfelt thanks to HOD XYZ for serving on my committee and being my academic advisor, guiding me through all the major decisions and above all believing in my abilities. And I cannot finish without thanking my Mother for always believing in me and my abilities, for pushing me a step further whenever I have stumbled. A cheerful thanks to few significant friends without whose constant love, help, support and motivation this task would not have been achieved. Above all, thank you God for all the opportunities that you have given me.

Abstract

The purpose of “Online Job Portal System” is to automate the existing manual system by the help of computerized equipments and full-fledge computer software, fulfilling their requirements, so that their valuable data/information can be stored for a longer period with easy accessing and manipulation of the same. The required software and hardware are easily available and easy to work with.

“Online Job Portal System” is secure, reliable and fast management system. It can assist the user to concentrate on their activities rather to concentrate on the record keeping. Thus it will help organization in better utilization of resources. The organization can maintain computerized records without redundant entries. That means that one need not be distracted by information that is not relevant, while being able to reach the information.

The aim is to automate its existing system by the help of computerized equipments and full-fledge computer software, fulfilling their requirements, so that their valuable data/information can be stored for a longer period with easy accessing and manipulation of the same. Basically the project describes how to manage for good performance and better services for the clients.

Objective

Computerized online Job Search System is developed to facilitate the General administration system to manage the various information of the Job Seeker and Employer and the processes involved in a placement company. So, that organization can access accurate information quickly and easily as and when required, thereby improving its operational efficiency & effectiveness

In today's competitive environment, where Everybody wants to be on the top, Information plays very crucial role. As fast as information is accessed and processed, it can give good results.

Today Internet is the fast way of transferring Data and Information over wide area, hence I have used internet as a way for exchanging information.

Computerized system helps to fulfill these goals. Computerization of the official works will help in doing lot of manual work quickly. It will help in easy storage and access of all information, in short period of time.

Introduction

Introduction:-

Online Job portal system is an application which connects employer and job seekers where employers are the source of the resources and the job seeker can find and apply for their targeted job.

In Online Job portal system we use PHP and MySQL database. This is the project which keeps records of the employer, jobseeker and administrator. Online Job portal system has three modules i.e. Jobseeker, Employer and Admin.

Admin Modules

This module provides administrator related functionalities. Administrator manages entire application and maintains the profiles of applicants and employers.

Dashboard: In this sections, admin can briefly view the total job category, total employer, total candidates and total job.

Job Category: In this section, admin can manage jobcategory (add/update/delete).

List of Employer: In this section, admin can view the list of employer and see the detail of individual employer.

Reg Jobseeker: In this section, admin can view the list of candidates(jobseeker) and see the detail of individual candidates(jobseeker).

Pages: In this section, admin can manage the about us and contact us pages.

Reports: In this section admin can generate report of how many employer and candidates register between two dates.

Search: In this section, admin can search a particular employer and candidates by company name and mobile number respectively.

Admin can also update his profile, change the password and recover the password.

Employer Module

This module provides functionalities related to employers. Employers can post vacancy details and update the details as and when necessary. Employers can search through applicant resumes based on different criteria.

Jobs: In this section, employer can post the job and manage the jobs.

Candidates List: In this section employer can view the list of applied candidates and send message to selected candidates.

Reports: In this section employer can view how many candidates apply for a job in particular periods.

Employer can also update his profile, change the password and recover the password.

Candidates(Jobseeker) Modules

Home: In this section, candidates can view job which is posted by employer and apply those jobs.

Applied Jobs: In this section, candidates can a view response of applied job.

About Us: In this section, candidates can view the about us page of website.

Contact Us: In this section, candidates can view the contact us page of website.

Candidates(Jobseeker) can also update his profile, change the password and recover the password.

Brief summary of home page

This is the home page of the website in which admin, registered employer and candidates can login their account. Visitor user can sign up for employer and candidates as per their needs.

Existing System : The present system requires applicants to search through print and visual media for job opportunities. Applicants need to apply for jobs using conventional methods and appear for interview on a specified date at a specified location. Employers need to advertise the vacancies and sort all applicant details, conduct selection procedures and complete the formalities. This approach is tedious and requires much effort and resources.

Proposed System: The proposed system is a web based application which allows applicants and employers to register their details. Applicants can browse through the vacancy details that are posted and can apply for the jobs online. Employers can browse through the posted resumes and select suitable candidates.

Scope:-

It may help collecting perfect management in details. In a very short time, the collection will be obvious, simple and sensible. It will help a person to know the management of passed years perfectly and vividly. It also helps in current all works relative to job portal system. It will be also reduced the cost of collecting the management & collection procedure will go on smoothly.

Our project aims is to automate the existing manual system by the help of computerized equipments and full-fledge computer software, fulfilling their requirements, so that their valuable data/information can be stored for a longer period with easy accessing and manipulation of the same. The required software and hardware are easily available and easy to work with.

Requirement Specification

Hardware Configuration :

Client Side:

RAM	512 MB
Hard disk	10 GB
Processor	1.0 GHz

Server side:

RAM	1 GB
Hard disk	20 GB
Processor	2.0 GHz

Software Requirement:

Client Side:

Web Browser	Google Chrome or any compatible browser
Operating System	Windows or any equivalent OS

Server Side:

Web Server	APACHE
Server side Language	PHP5.6 or above version
Database Server	MYSQL
Web Browser	Google Chrome or any compatible browser
Operating System	Windows or any equivalent OS

APACHE

The Apache HTTP Server Project is an effort to develop and maintain an open-source HTTP server for modern operating systems including UNIX and Windows. The goal of this project is to provide a secure, efficient and extensible server that provides HTTP services in sync with the current HTTP standards.

The Apache HTTP Server ("httpd") was launched in 1995 and it has been the most popular web server on the Internet since April 1996. It has celebrated its 20th birthday as a project in February 2015.

PHP

- PHP stands for PHP: Hypertext Preprocessor.
- PHP is a server-side scripting language, like ASP.

- PHP scripts are executed on the server.
 - PHP supports many databases (MYSQL, Informix, Oracle, Sybase, Solid, Generic ODBC, etc.).
-
- PHP is an open source software .
 - PHP is free to download and use.

MYSQL

- MYSQL is a database server
- MYSQL is ideal for both small and large applications
- MYSQL supports standard SQL
- MYSQL compiles on a number of platforms
- MYSQL is free to download and use
- How to access MySQL:

<http://localhost/phpmyadmin>

Analysis and Design

Analysis:

In present all visitor parking work done on the paper. The whole year visitor parking record is stored in the registers. We can't generate reports as per our requirements because its take more time to calculate the visitors parking report.

Disadvantage of present system:

- **Not user friendly:** The present system not user friendly because data is not stored in structure and proper format.
- **Manual Control:** All report calculation is done manually so there is a chance of error.
- **Lots of paper work:** Visitors maintain in the register so lots of paper require storing details.
- **Time consuming**

Design Introduction:

Design is the first step in the development phase for any techniques and principles for the purpose of defining a device, a process or system in sufficient detail to permit its physical realization.

Once the software requirements have been analyzed and specified the software design involves three technical activities - design, coding, implementation and testing that are required to build and verify the software.

The design activities are of main importance in this phase, because in this activity, decisions ultimately affecting the success of the software implementation and its ease of maintenance are made. These decisions have the final bearing upon reliability and maintainability of the system. Design is the only way to accurately translate the customer's requirements into finished software or a system.

Design is the place where quality is fostered in development. Software design is a process through which requirements are translated into a representation of software. Software design is conducted in two steps. Preliminary design is concerned with the transformation of requirements into data

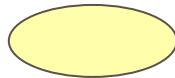

UML Diagrams:

Actor:

A coherent set of roles that users of use cases play when interacting with the use `cases.

Use case:A description of sequence of actions, including variants, that a system performs that yields an observable result of value of an actor.

UML stands for Unified Modeling Language. UML is a language for specifying, visualizing and documenting the system. This is the step while developing any product after analysis. The goal from this is to produce a model of the entities involved in the project which later need to be built. The representation of the entities that are to be used in the product being developed need to be designed.

USECASE DIAGRAMS:

Use case diagrams model behavior within a system and helps the developers understand of what the user require. The stick man represents what's called an actor.

Use case diagram can be useful for getting an overall view of the system and clarifying who can do and more importantly what they can't do.

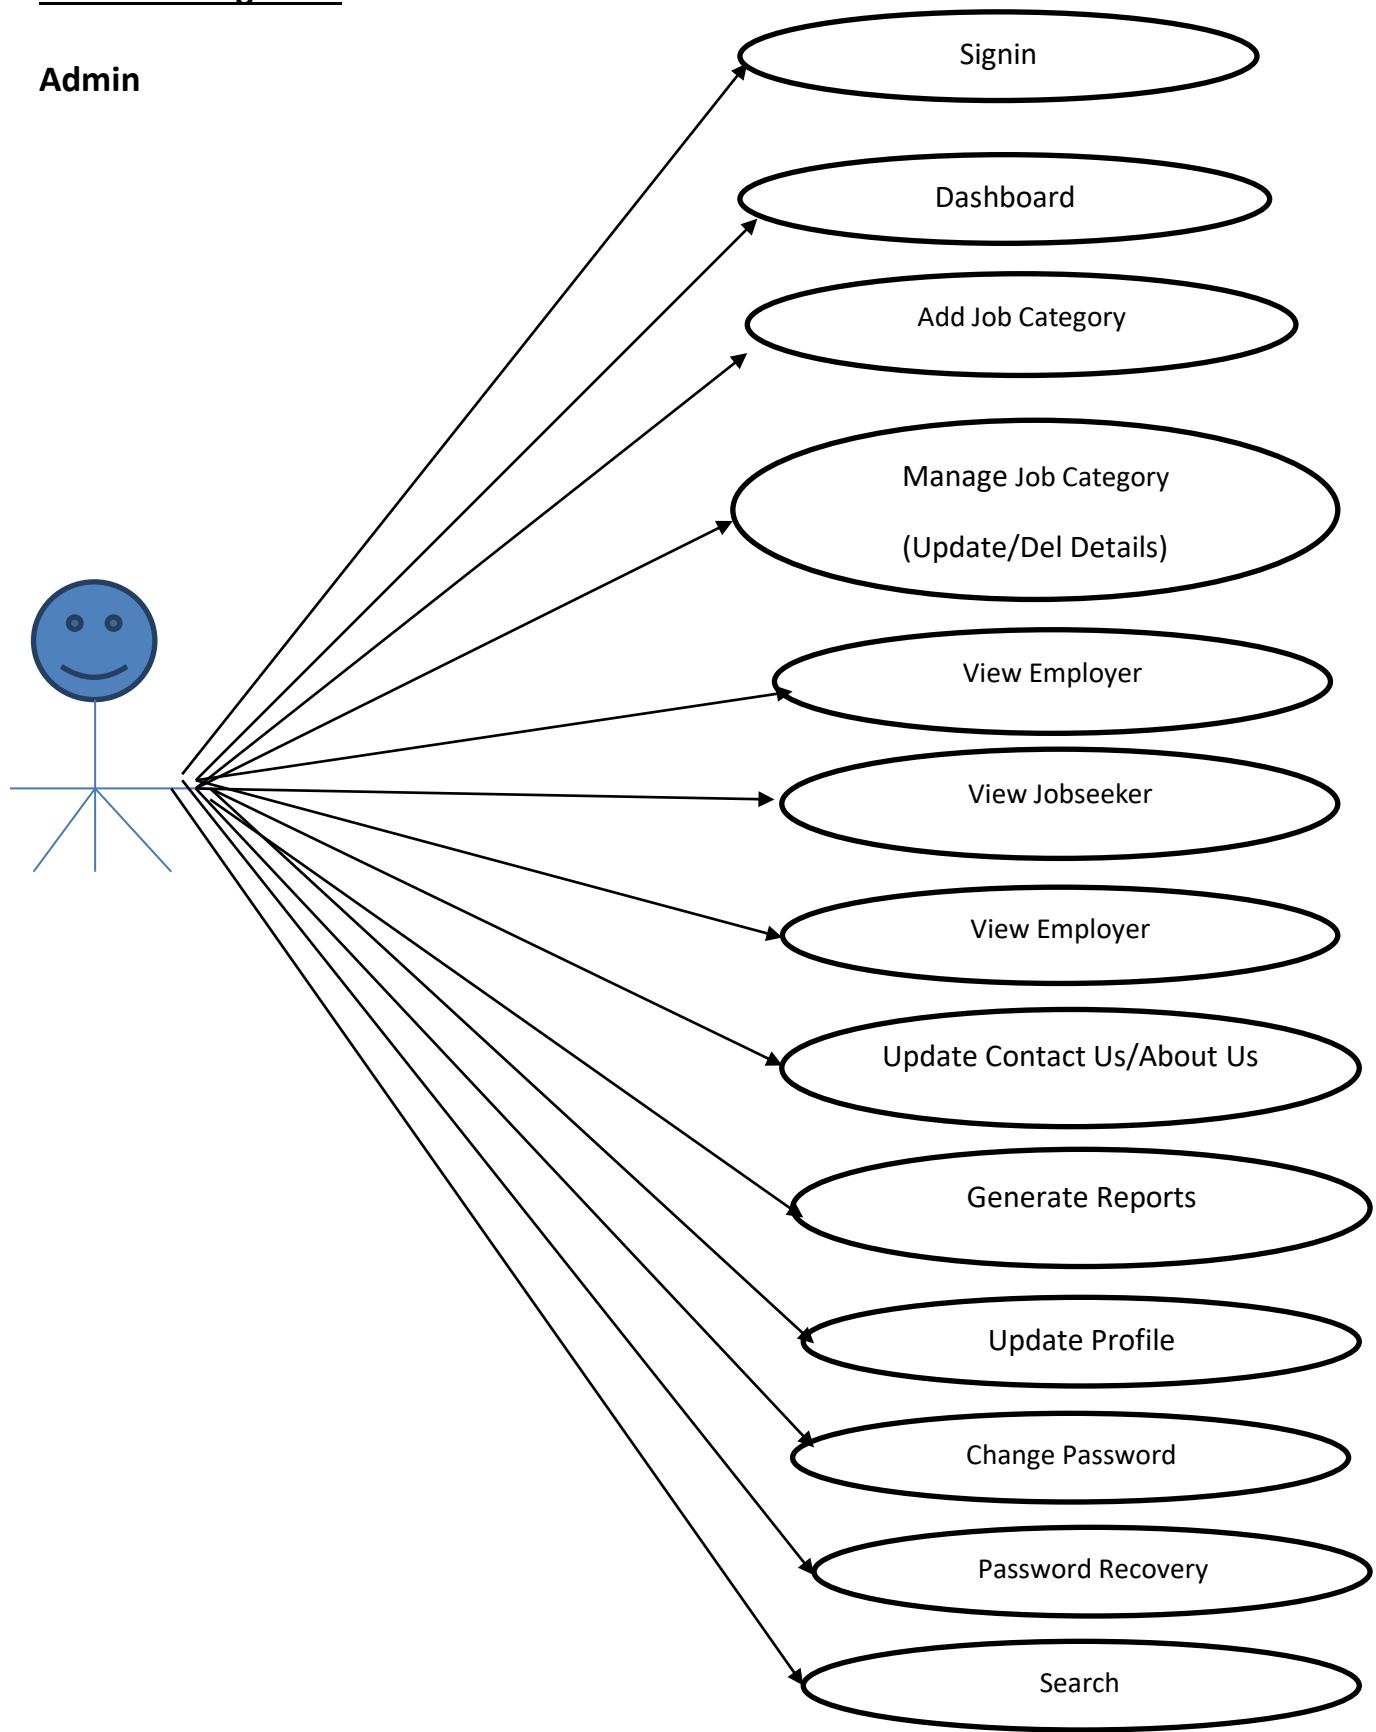

Use case diagram consists of use cases and actors and shows the interaction between the use case and actors.

- The purpose is to show the interactions between the use case and actor.
- To represent the system requirements from user's perspective.
- An actor could be the end-user of the system or an external system.

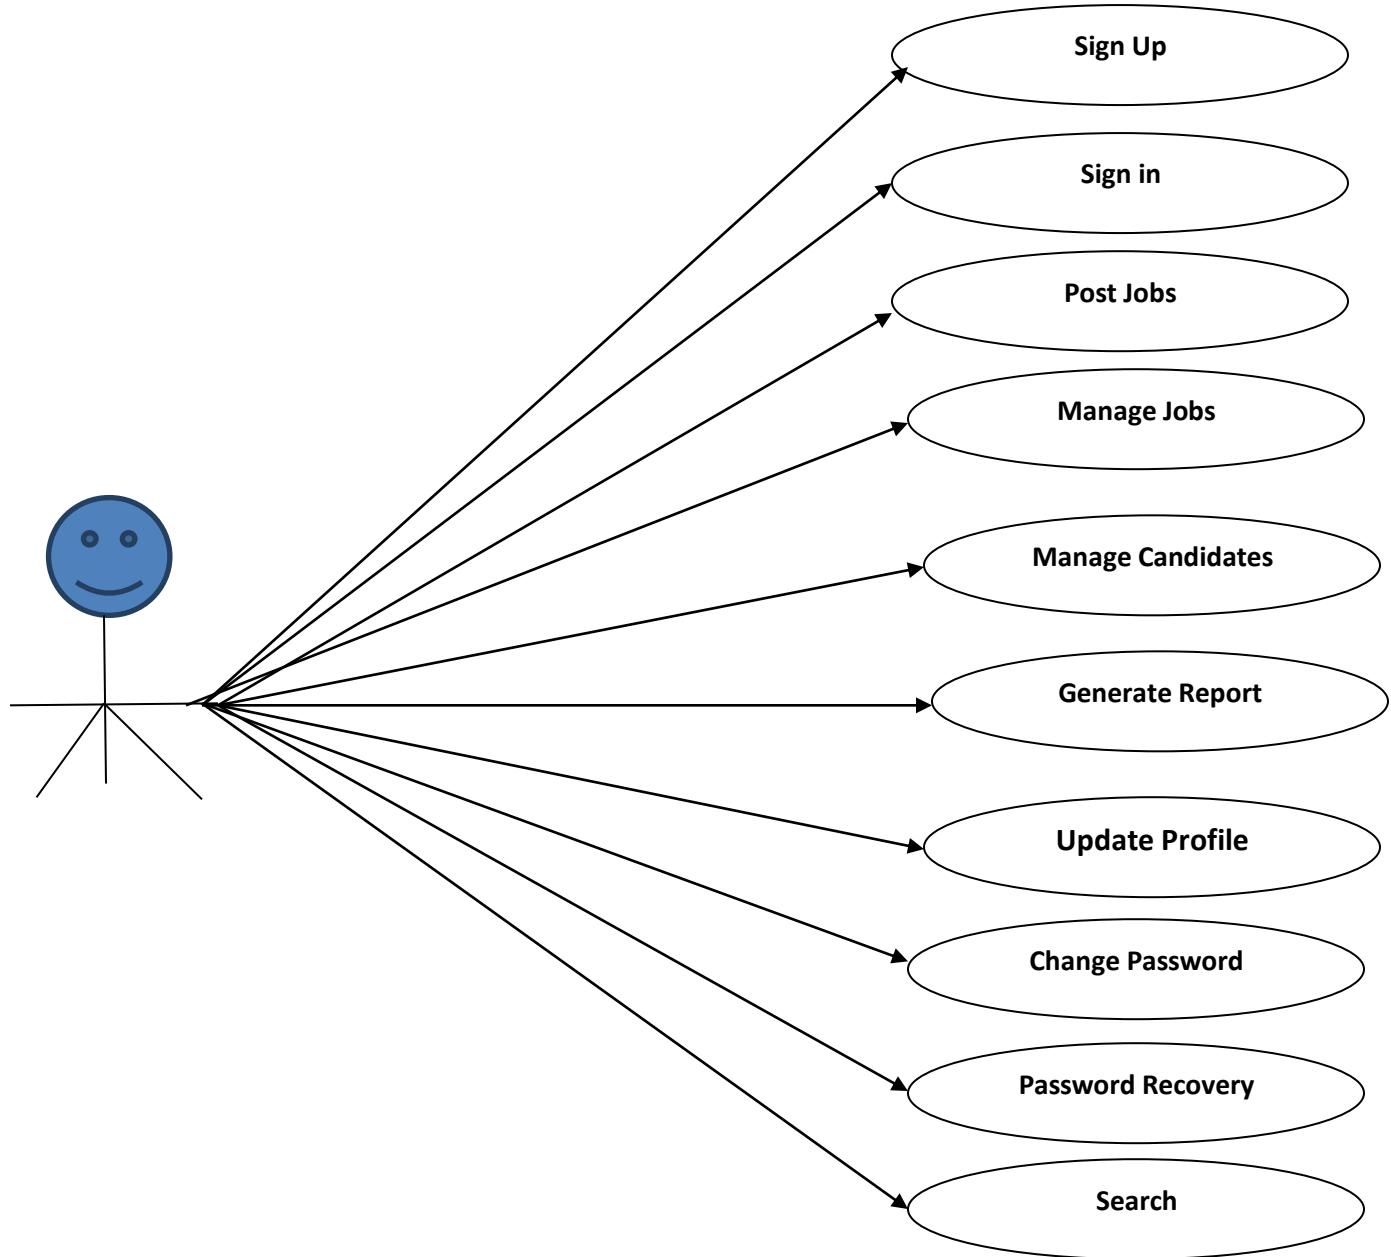

USECASE DIAGRAM: A Use case is a description of set of sequence of actions. Graphically it is rendered as an ellipse with solid line including only its name. Use case diagram is a behavioral diagram that shows a set of use cases and actors and their relationship. It is an association between the use cases and actors. An actor represents a real-world object. Primary Actor – Sender, Secondary Actor Receiver.

Use Case Diagrams:

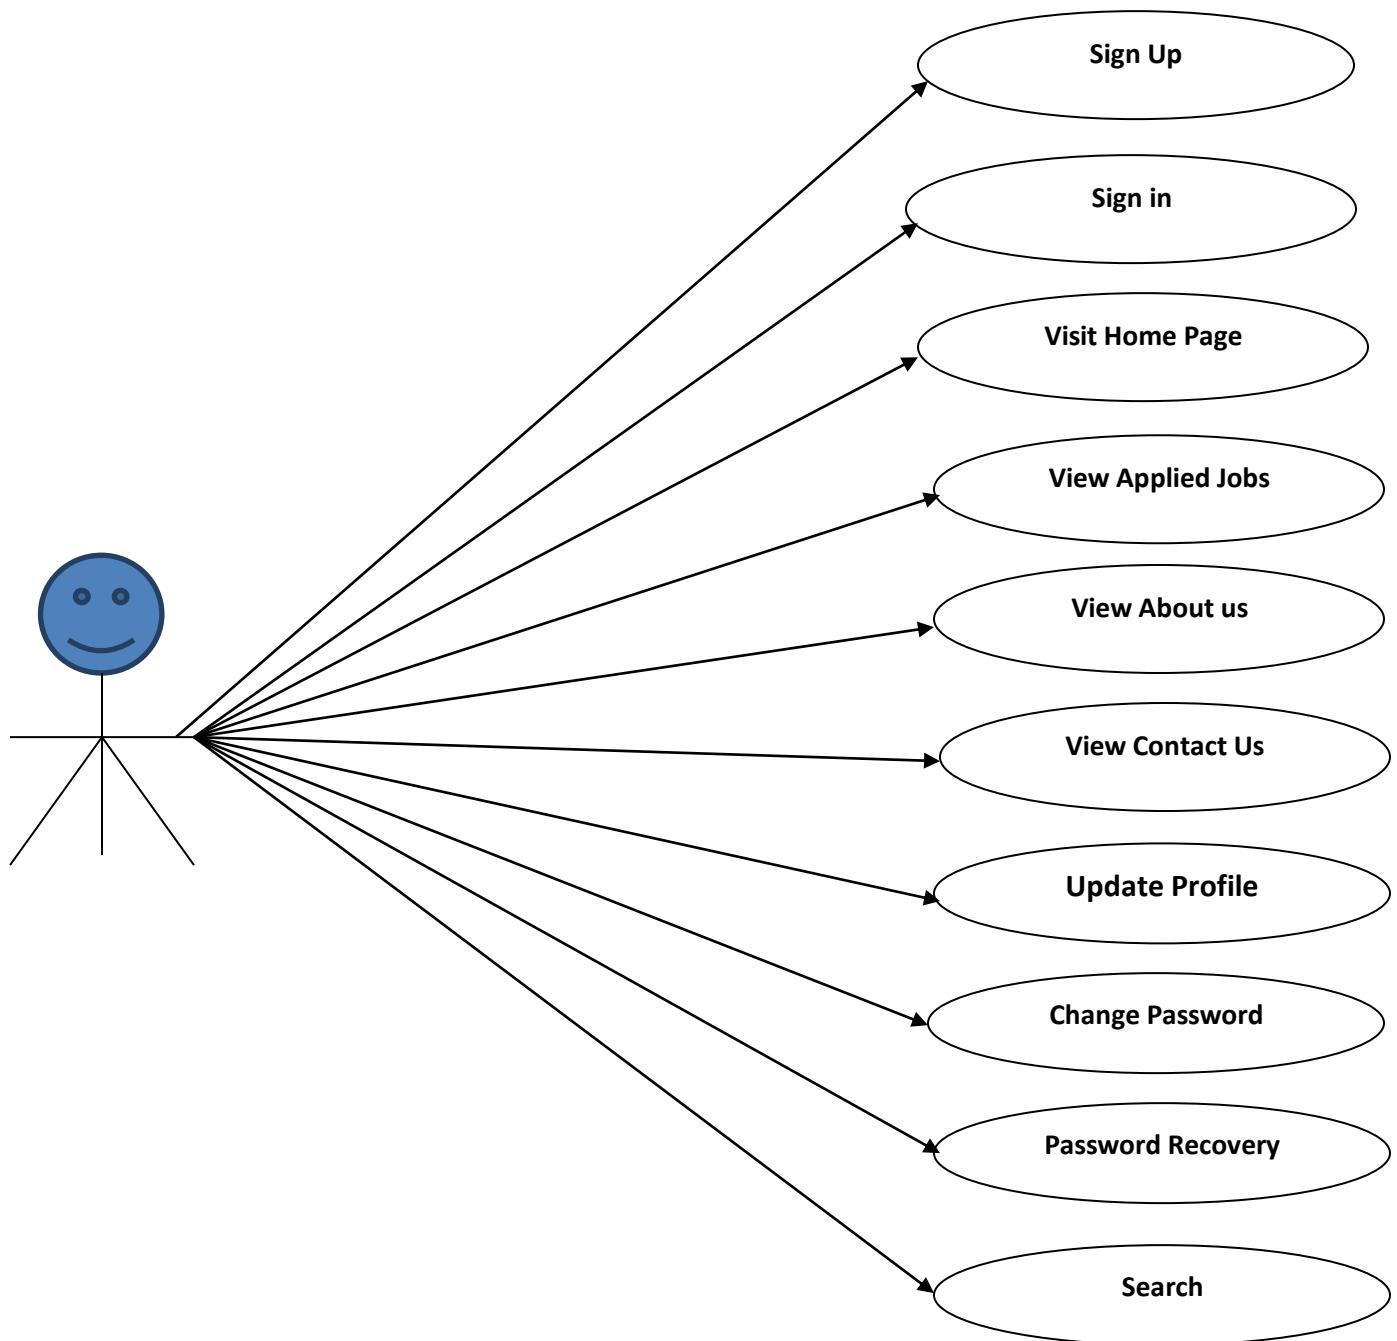

Admin

Employer

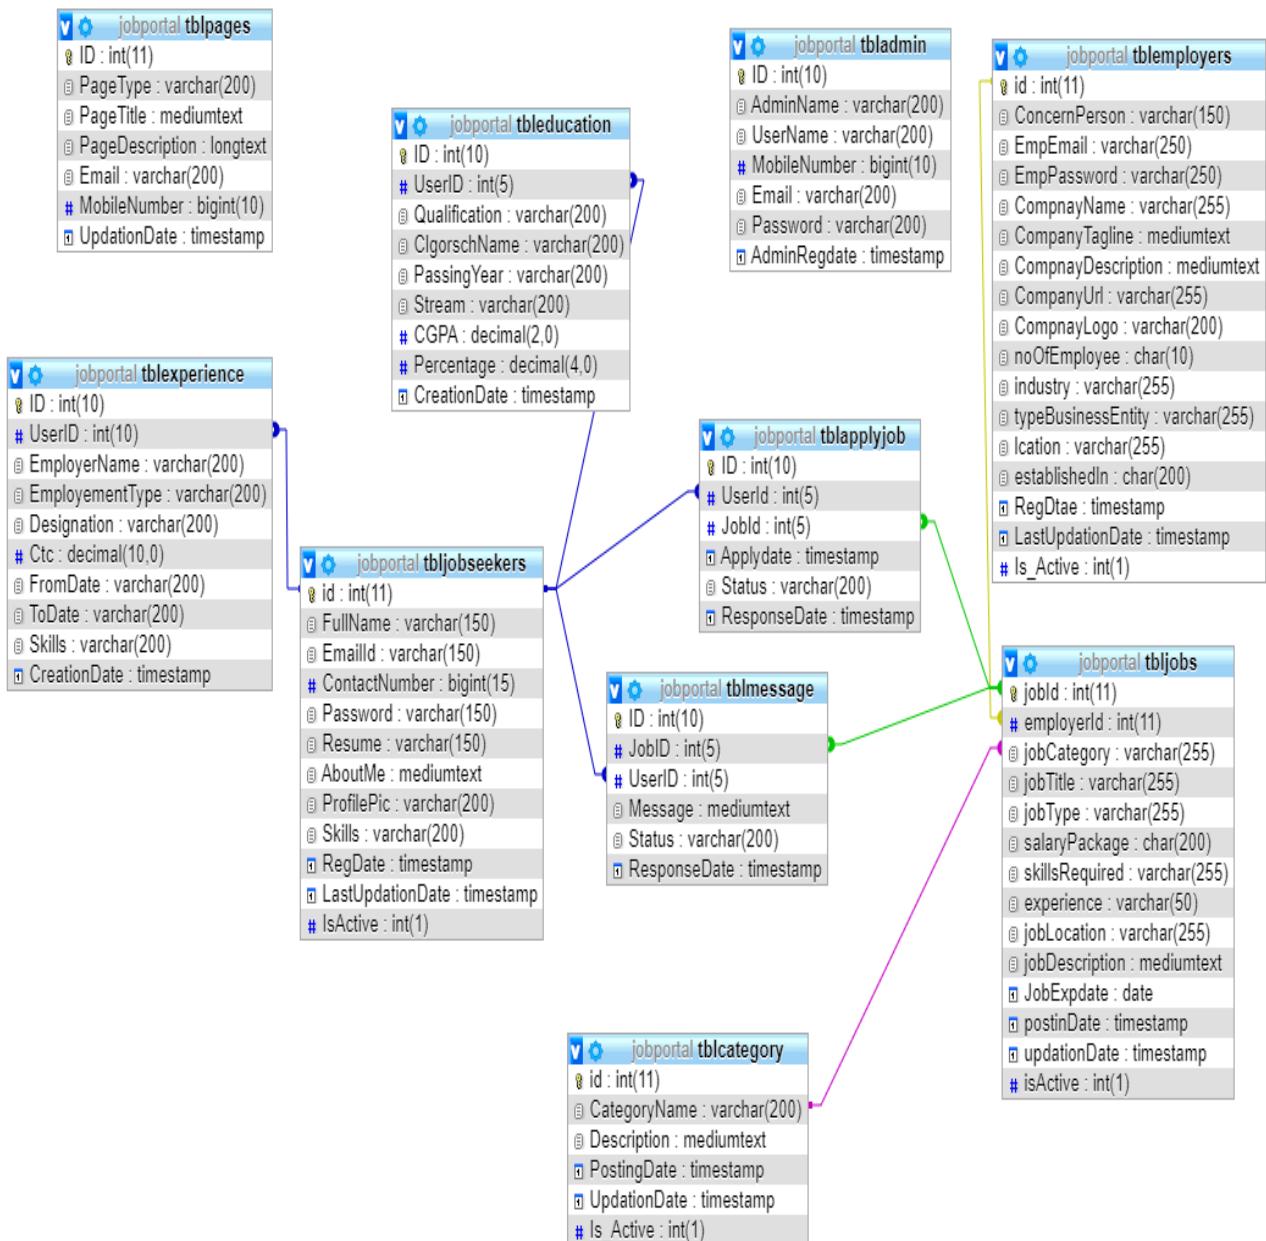

Candidates (Jobseeker)

Class Diagram:

A description of set of objects that share the same attributes operations, relationships, and semantics

ER Diagram:

The Entity-Relationship (ER) model was originally proposed by Peter in 1976 [Chen76] as a way to unify the network and relational database views. Simply stated the ER model is a conceptual data model that views the real world as entities and relationships. A basic component of the model is the Entity-Relationship diagram which is used to visually represent data objects. Since Chen

wrote his paper the model has been extended and today it is commonly used for database design for the database designer, the utility of the ER model is:

- It maps well to the relational model. The constructs used in the ER model can easily be transformed into relational tables.
- It is simple and easy to understand with a minimum of training. Therefore, the model can be used by the database designer to communicate the design to the end user.
- In addition, the model can be used as a design plan by the database developer to implement a data model in specific database management software.

ER Notation

There is no standard for representing data objects in ER diagrams. Each modeling methodology uses its own notation. The original notation used by Chen is widely used in academics texts and journals but rarely seen in either CASE tools or publications by non-academics. Today, there are a number of notations used; among the more common are Bachman, crow's foot, and IDEFIX.

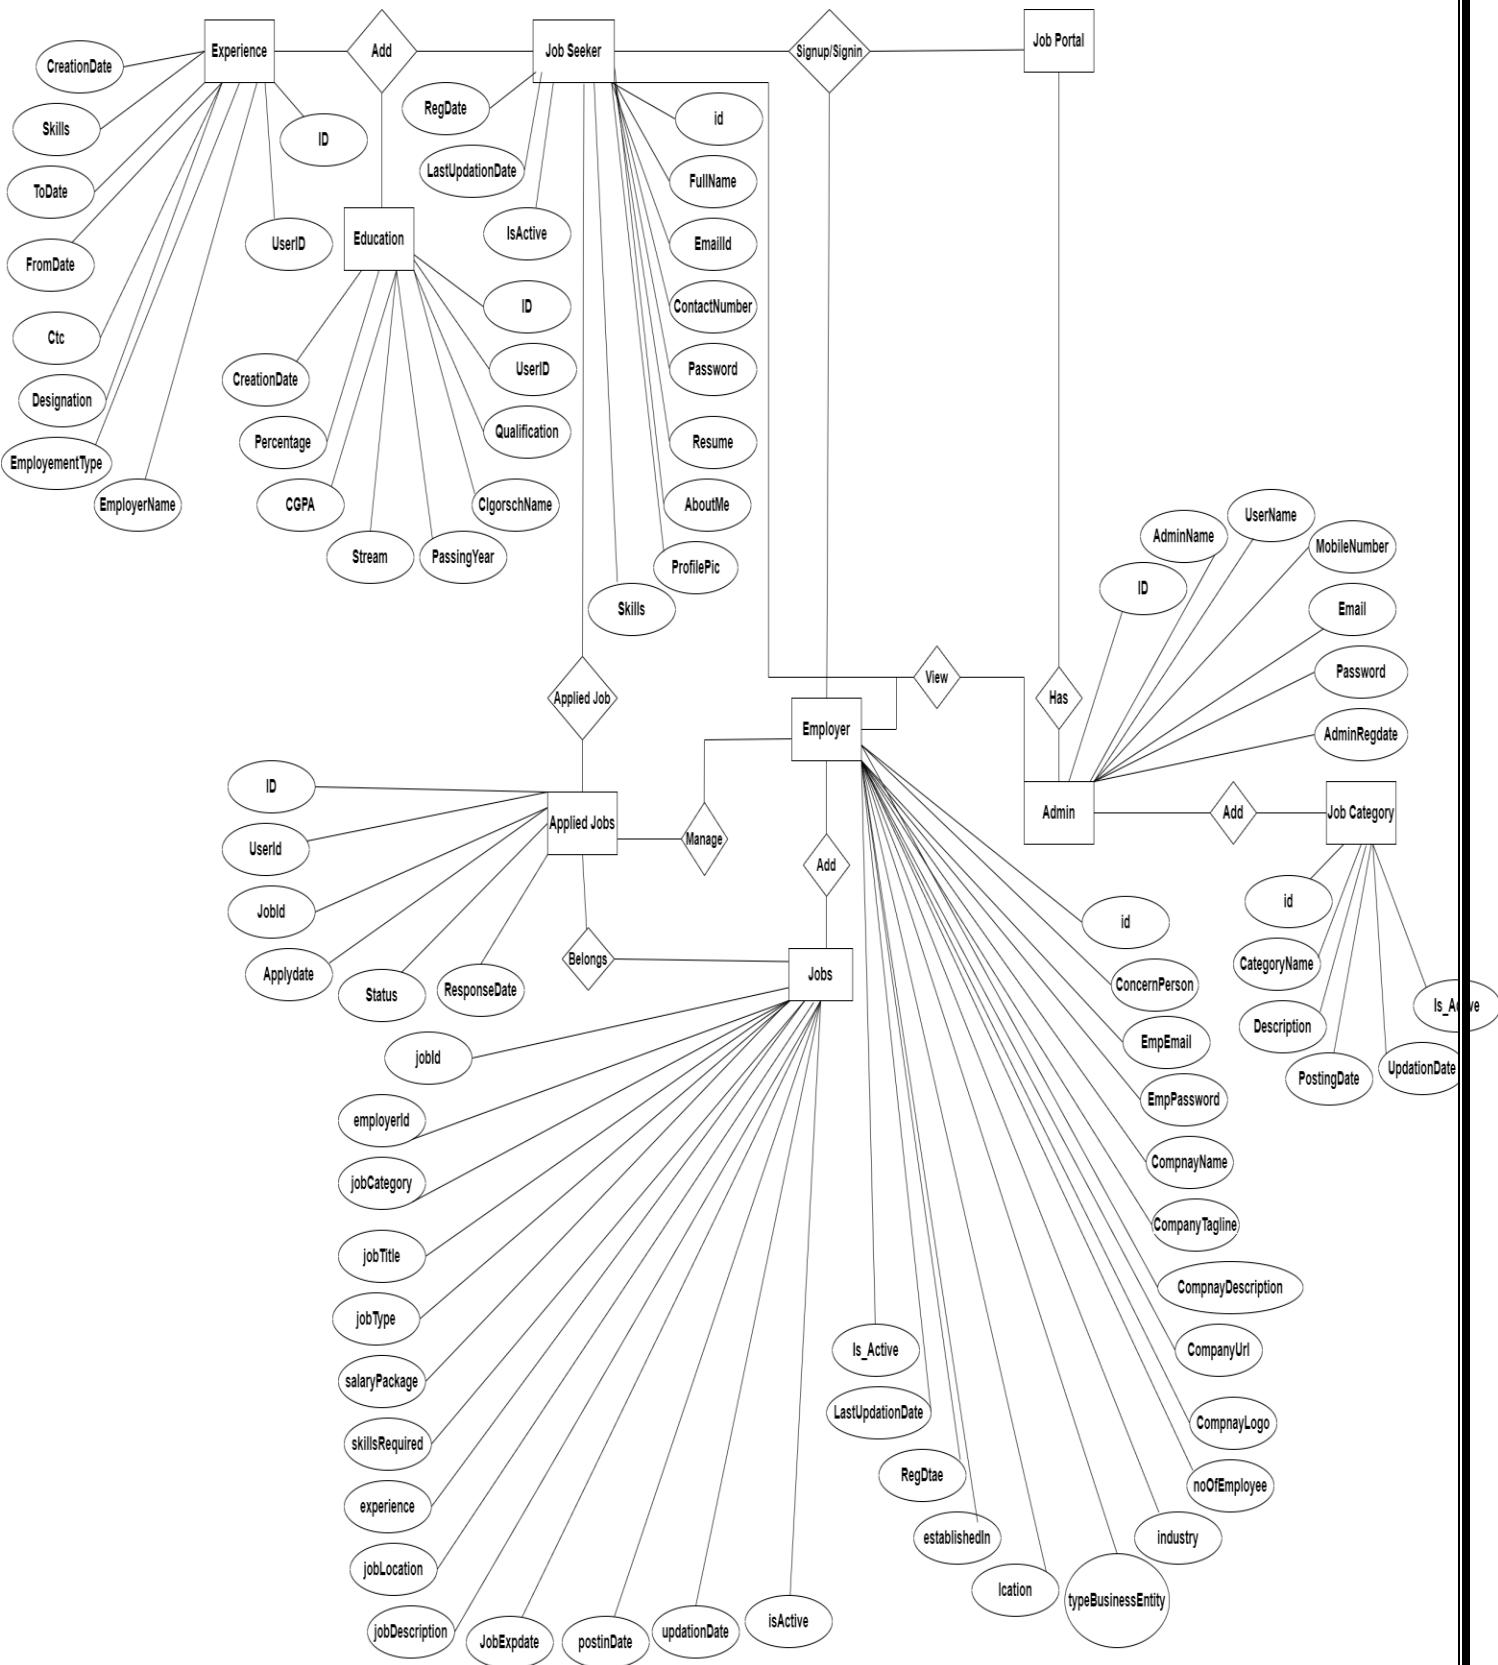

All notational styles represent entities as rectangular boxes and relationships as lines connecting boxes. Each style uses a special set of symbols to represent the cardinality of a connection. The notation used in this document is from Martin. The symbols used for the basic ER constructs are:

- **Entities** are represented by labeled rectangles. The label is the name of the entity. Entity names should be singular nouns.

- **Relationships** are represented by a solid line connecting two entities. The name of the relationship is written above the line. Relationship names should be verbs
- **Attributes**, when included, are listed inside the entity rectangle. Attributes which are identifiers are underlined. Attribute names should be singular nouns.
- **Cardinality** of many is represented by a line ending in a crow's foot. If the crow's foot is omitted, the cardinality is one.

Existence is represented by placing a circle or a perpendicular bar on the line. Mandatory existence is shown by the bar (looks like a 1) next to the entity for an instance is required. Optional existence is shown by placing a circle next to the entity that is optional.

ER Diagram

MySQL Data Tables:

Admin Table:(Table name is admin)

This store admin personal and login details.

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra
1	ID 	int(10)			No	None		AUTO_INCREMENT
2	AdminName	varchar(200)	utf8mb4_general_ci		Yes	NULL		
3	UserName	varchar(200)	utf8mb4_general_ci		Yes	NULL		
4	MobileNumber	bigint(10)			Yes	NULL		
5	Email	varchar(200)	utf8mb4_general_ci		Yes	NULL		
6	Password	varchar(200)	utf8mb4_general_ci		Yes	NULL		
7	AdminRegdate	timestamp			Yes	current_timestamp()		

Category Table(Table name is tblcategory)

This table store category of jobs.

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra
1	id 	int(11)			No	None		AUTO_INCREMENT
2	CategoryName 	varchar(200)	latin1_swedish_ci		No	None		
3	Description	mediumtext	latin1_swedish_ci		No			
4	PostingDate	timestamp			No	current_timestamp()		
5	UpdationDate	timestamp			Yes	NULL		
6	Is_Active	int(1)			No	None		

Apply Job Table: (Table name is tblapplyjob)

This table store the details of apply jobs.

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra
1	ID 	int(10)			No	None		AUTO_INCREMENT
2	UserId	int(5)			Yes	NULL		
3	JobId	int(5)			Yes	NULL		
4	Applydate	timestamp			No	current_timestamp()		ON UPDATE CURRENT_TIMESTAMP()
5	Status	varchar(200)	utf8mb4_general_ci		Yes	NULL		
6	ResponseDate	timestamp			Yes	NULL		ON UPDATE CURRENT_TIMESTAMP()

Education Table: (Table name is tbleducation)

This table stores the education details of candidates.

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra
1	ID 	int(10)			No	None		AUTO_INCREMENT
2	UserID 	int(5)			Yes	NULL		
3	Qualification	varchar(200)	utf8mb4_general_ci		Yes	NULL		
4	ClgorschName	varchar(200)	utf8mb4_general_ci		Yes	NULL		
5	PassingYear	varchar(200)	utf8mb4_general_ci		Yes	NULL		
6	Stream	varchar(200)	utf8mb4_general_ci		Yes	NULL		
7	CGPA	decimal(2,0)			Yes	NULL		
8	Percentage	decimal(4,0)			Yes	NULL		
9	CreationDate	timestamp			Yes	current_timestamp()		

Experience Table: (Table name is tblexperience)

This table stores the experience details of candidates.

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra
1	ID 	int(10)			No	None		AUTO_INCREMENT
2	UserID 	int(10)			Yes	NULL		
3	EmployerName	varchar(200)	utf8mb4_general_ci		Yes	NULL		
4	EmployementType	varchar(200)	utf8mb4_general_ci		Yes	NULL		
5	Designation	varchar(200)	utf8mb4_general_ci		Yes	NULL		
6	Ctc	decimal(10,0)			Yes	NULL		
7	FromDate	varchar(200)	utf8mb4_general_ci		Yes	NULL		
8	ToDate	varchar(200)	utf8mb4_general_ci		Yes	NULL		
9	Skills	varchar(200)	utf8mb4_general_ci		No	None		
10	CreationDate	timestamp			Yes	current_timestamp()		

Employers Table: (Table name is tblemployers)

This table stores details of employers.

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra
1	id 	int(11)			No	None		AUTO_INCREMENT
2	ConcernPerson	varchar(150)	latin1_swedish_ci		Yes	NULL		
3	EmpEmail	varchar(250)	latin1_swedish_ci		Yes	NULL		
4	EmpPassword	varchar(250)	latin1_swedish_ci		Yes	NULL		
5	CompnayName	varchar(255)	latin1_swedish_ci		Yes	NULL		
6	CompanyTagline	mediumtext	latin1_swedish_ci		Yes			
7	CompnayDescription	mediumtext	latin1_swedish_ci		Yes			
8	CompanyUrl	varchar(255)	latin1_swedish_ci		Yes	NULL		
9	CompnayLogo	varchar(200)	latin1_swedish_ci		Yes	NULL		
10	noOfEmployee	char(10)	latin1_swedish_ci		Yes	NULL		
11	industry	varchar(255)	latin1_swedish_ci		Yes	NULL		
12	typeBusinessEntity	varchar(255)	latin1_swedish_ci		Yes	NULL		
13	Ication	varchar(255)	latin1_swedish_ci		Yes	NULL		
14	establishedIn	char(200)	latin1_swedish_ci		Yes	NULL		
15	RegDtae	timestamp			Yes	NULL		
16	LastUpdationDate	timestamp			No	current_timestamp()		ON UPDATE CURRENT_TIMESTAMP()
17	Is_Active	int(1)			Yes	NULL		

Jobs Table: (Table name is tbljobs)

This table stores details of jobs which are posted by employers.

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra
1	jobId 	int(11)			No	None		AUTO_INCREMENT
2	employerId	int(11)			No	None		
3	jobCategory	varchar(255)	latin1_swedish_ci		Yes	NULL		
4	jobTitle	varchar(255)	latin1_swedish_ci		Yes	NULL		
5	jobType	varchar(255)	latin1_swedish_ci		Yes	NULL		
6	salaryPackage	char(200)	latin1_swedish_ci		Yes	NULL		
7	skillsRequired	varchar(255)	latin1_swedish_ci		Yes	NULL		
8	experience	varchar(50)	latin1_swedish_ci		Yes	NULL		
9	jobLocation	varchar(255)	latin1_swedish_ci		Yes	NULL		
10	jobDescription	mediumtext	latin1_swedish_ci		Yes			
11	JobExptdate	date			Yes	NULL		
12	postinDate	timestamp			Yes	current_timestamp()		
13	updationDate	timestamp			Yes	NULL		ON UPDATE CURRENT_TIMESTAMP()
14	isActive	int(1)			No	None		

Jobseekers Table: (Table name is tbljobseekers)

This table stores details of jobseeker.

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra
1	 id	int(11)			No	None		AUTO_INCREMENT
2	FullName	varchar(150)	latin1_swedish_ci		Yes	NULL		
3	EmailId	varchar(150)	latin1_swedish_ci		Yes	NULL		
4	ContactNumber	bigint(15)			Yes	NULL		
5	Password	varchar(150)	latin1_swedish_ci		Yes	NULL		
6	Resume	varchar(150)	latin1_swedish_ci		Yes	NULL		
7	AboutMe	mediumtext	latin1_swedish_ci		Yes			
8	ProfilePic	varchar(200)	latin1_swedish_ci		Yes	NULL		
9	Skills	varchar(200)	latin1_swedish_ci		No	None		
10	RegDate	timestamp			Yes	current_timestamp()		
11	LastUpdationDate	timestamp			Yes	NULL		ON UPDATE CURRENT_TIMESTAMP()
12	IsActive	int(1)			Yes	NULL		

Message Table: (Table name is tblmessage)

This table stores message detail which is send by employer to jobseeker.

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra
1	 ID	int(10)			No	None		AUTO_INCREMENT
2	JobID	int(5)			Yes	NULL		
3	UserID	int(5)			Yes	NULL		
4	Message	mediumtext	utf8mb4_general_ci		Yes			
5	Status	varchar(200)	utf8mb4_general_ci		Yes	NULL		
6	ResponseDate	timestamp			Yes	NULL		ON UPDATE CURRENT_TIMESTAMP()

Pages Table: (Table name is tblpages)

This table stores about us and contact us details.

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra
1	ID 	int(11)			No	None		AUTO_INCREMENT
2	PageType	varchar(200)	latin1_swedish_ci		Yes	NULL		
3	PageTitle	mediumtext	latin1_swedish_ci		Yes			
4	PageDescription	longtext	latin1_swedish_ci		Yes			
5	Email	varchar(200)	latin1_swedish_ci		No	None		
6	MobileNumber	bigint(10)			No	None		
7	UpdationDate	timestamp			Yes	NULL		ON UPDATE CURRENT_TIMESTAMP()

Implementation and System Testing

After all phase have been perfectly done, the system will be implemented to the server and the system can be used.

System Testing

The goal of the system testing process was to determine all faults in our project .The program was subjected to a set of test inputs and many explanations were made and based on these explanations it will be decided whether the program behaves as expected or not. Our Project went through two levels of testing

1. Unit testing

2. Integration testing

UNIT TESTING

Unit testing is commenced when a unit has been created and effectively reviewed .In order to test a single module we need to provide a complete environment i.e. besides the section we would require

- The procedures belonging to other units that the unit under test calls

- Non local data structures that module accesses
- A procedure to call the functions of the unit under test with appropriate parameters

1. Test for the admin module

- **Testing admin login form**-This form is used for log in of administrator of the system. In this form we enter the username and password if both are correct administration page will open otherwise if any of data is wrong it will get redirected back to the login page and again ask the details.
- **Report Generation:** admin can generate report from the main database.

INTEGRATION TESTING

In the Integration testing we test various combination of the project module by providing the input.

The primary objective is to test the module interfaces in order to confirm that no errors are occurring when one module invokes the other module.

EVALUATION

Project URL: <http://localhost/vpms>

Home Page

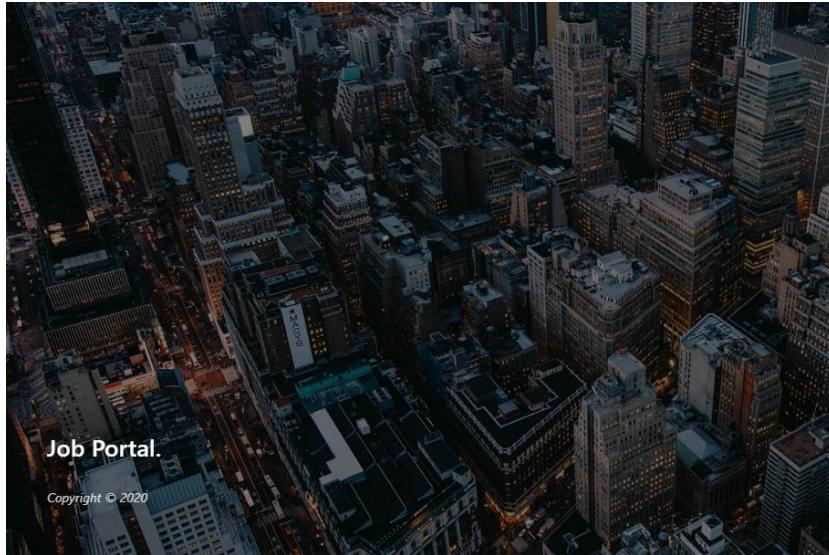

The screenshot displays the homepage of a Job Portal. At the top, there is a navigation bar with links for Home, Jobseekers, Employers, Admin, About Us, and Contact Us. A user icon is also present. Below the navigation is a search bar with fields for 'Enter Job Title' and 'Enter Company', and a search button. Two buttons are available: 'I'M A JOBSEEKER' and 'I'M AN EMPLOYER'. The main content area features a section titled 'Popular Jobs Categories' with icons for 'Development - IT' and 'HR'. A blue banner at the bottom of this section says 'EXPLORE ALL JOBS'. Below this is a section titled 'Recent Hot Jobs' featuring three job listings:

- PHP Developer** at PHPGurukul in New York, California, posted on 2018-09-29 12:31:21. It offers \$4000-10000 and is a **FULL TIME** position.
- HR Executive** at PHPGurukul in Hyderabad, posted on 2018-09-29 12:47:54. It offers \$1000-5000 and is a **CONTRACT** position.
- Java Developer** at PHPGurukul in New Delhi, Bangalore, posted on 2018-09-29 16:33:37. It offers \$5000-10000 and is a **FULL TIME** position.

At the bottom of the page, a blue banner states 'Better Results with Standardized Hiring Process' and 'Your quality of hire increases when you treat everyone fairly and equally. Having multiple recruiters working on your hiring is beneficial.' It includes a 'GET REGISTERED & TRY NOW' button. The footer contains links for 'Job Portal', 'Quick Links' (About, Contact, Home, Admin, Jobseeker, Employer), 'Job Category' (Development - IT, HR), the 'Job Portal' logo, and social media links for Google+, Twitter, LinkedIn, and Facebook. A copyright notice 'Jobportal © 2020' is also present.

Admin

Login Page

Dashboard

A screenshot of the Job Portal dashboard. The left sidebar is dark with white icons and text, including "TEST", "DASHBOARDS", "JOB CATEGORY", "LIST OF EMPLOYERS", "REG JOBSEEKERS", "PAGES", "B/W DATES REPORT", and "SEARCH". The main area has a green header bar with the word "Dashboard". Below it are four cards: "Total Job Category" (4), "Total Employer" (2), "Total Candidates" (2), and "Total Jobs" (3). At the bottom, there is a footer bar with the text "Job Portal @ 2020" on the left and "Crafted with ❤️" on the right.

Profile

The screenshot shows the 'Admin Profile' section of the Job Portal. On the left is a dark sidebar with navigation links: DASHBOARDS, JOB CATEGORY, LIST OF EMPLOYERS, REG JOBSEEKERS, PAGES, B/W DATES REPORT, and SEARCH. The main area has a header 'Admin Profile' and a green header bar labeled 'Admin Profile'. It contains fields for Admin Name (Test), User Name (admin), Email (admin@gmail.com), and Contact Number (7987979878). The Admin Registration Date is listed as 2020-06-05 00:00:00. A green 'Update' button is at the bottom. The footer includes 'Job Portal @ 2020' and 'Crafted with ❤'.

Change Password

The screenshot shows the 'Change Password' page of the Job Portal. The sidebar is identical to the previous screenshot. The main area has a header 'Change Password' and a green header bar labeled 'Change Password'. It contains fields for Current Password, New Password, and Confirm Password. A green 'Change' button is at the bottom. The footer includes 'Job Portal @ 2020' and 'Crafted with ❤'.

Add Job Category

The screenshot shows the 'Add Category' form. On the left is a dark sidebar with navigation links: DASHBOARDS, JOB CATEGORY (selected), LIST OF EMPLOYERS, REG JOBSEEKERS, PAGES, B/W DATES REPORT, and SEARCH. The main area has a teal header bar with the title 'Add Category'. Below it is a 'Category:' input field and a larger 'Category Description:' text area. A green 'Add' button is at the bottom. The footer includes the text 'Job Portal @ 2020' and 'Crafted with ❤'.

Manage Job Category

The screenshot shows the 'Manage Category' page. The sidebar and header are identical to the previous screenshot. The main area displays a table of existing categories:

	CATEGORY NAME	CREATION DATE	ACTION
1	Development - IT	\$2018-09-03 12:02:34	
2	HR	\$2018-09-03 12:03:33	
3	Operations	\$2018-09-03 12:04:27	
4	Finance	\$2020-06-05 16:56:40	

The footer includes the text 'Job Portal @ 2020' and 'Crafted with ❤'.

Update Job Category

The screenshot shows the 'Edit Category' page of the Job Portal. On the left is a dark sidebar with navigation links: DASHBOARDS, JOB CATEGORY (selected), LIST OF EMPLOYERS, REG JOBSEEKERS, PAGES, B/W DATES REPORT, and SEARCH. The main area has a green header bar with 'Edit Category'. Below it, there's a 'Category' input field containing 'Development - IT', a 'Category Description' text area with 'Development -Information Technology.', and a green 'Update' button. At the bottom, it says 'Job Portal @ 2020' and 'Crafted with ❤'.

List of Employers

The screenshot shows the 'Employer Lists' page of the Job Portal. The sidebar is identical to the previous screenshot. The main area has a green header bar with 'Employer Lists'. Below it is a table with columns: COMPANY NAME, CONCERN PERSON, EMAIL, STATUS, REGISTRATION DATE, and ACTION. Two entries are listed: '1 PHPGurukul' with 'Anuj kumar' and email 'phpgurukulofficial@gmail.com', and '2 Apple' with 'John Doe' and email 'johndoe@test.com'. Both rows have an 'eye' icon in the ACTION column. At the bottom, it says 'Showing 1 to 2 of 2 entries', 'First', 'Previous', '1' (highlighted), 'Next', and 'Last'. The footer says 'Job Portal @ 2020' and 'Crafted with ❤'.

View Single detail of Employer

The screenshot shows the 'View Employer Details' page. On the left is a dark sidebar with navigation links: DASHBOARDS, JOB CATEGORY, LIST OF EMPLOYERS, REG JOBSEEKERS, PAGES, B/W DATES REPORT, and SEARCH. At the top right is a dropdown menu set to 'Test'. The main content area has a green header 'View Employer Details'. Below it is a table with columns: Name of Company (PHPGurukul), Company Logo (MySQL logo), Company Tag Line (Don't be afraid of source code), Concern Person (Anuj kumar), Email (phpgurukulofficial@gmail.com), and Company Tagline (Don't be afraid of source code). A section titled 'Company Description' follows, containing text about PHP GURUKUL's mission to provide free education and its focus on teaching through projects. Another table below lists Industry (New Delhi, India), Education (New Delhi, India), Business Entity (LLP), Location (New Delhi, India), Company URL (https://phpgurukul.com/), Number of Employee (5), and Established Date (2015). At the bottom are copyright notices: 'Job Portal @ 2020' and 'Crafted with ❤'.

List of Registered Candidates (Jobseeker)

The screenshot shows the 'Jobseeker Lists' page. The sidebar and top navigation are identical to the previous screenshot. The main content area has a green header 'Jobseeker Lists'. It features a table with columns: FULL NAME, CONTACT NUMBER, EMAIL, STATUS, and REGISTRATION DATE. Two entries are listed: Anuj Kumar (Active, 2020-03-26) and Sarita (Active, 2020-06-02). Below the table is a message 'Showing 1 to 2 of 2 entries' and a navigation bar with buttons for First, Previous, Next, and Last. Copyright notices at the bottom are 'Job Portal @ 2020' and 'Crafted with ❤'.

View Single detail of Jobseeker

The screenshot displays a web-based job portal interface. On the left, a dark sidebar menu lists various administrative functions: DASHBOARDS, JOB CATEGORY, LIST OF EMPLOYERS, REG JOBSEEKERS, PAGES, B/W DATES REPORT, and SEARCH. A user profile icon labeled 'TEST' is at the top of the sidebar. The main content area has a light gray background. At the top right, there is a dropdown menu set to 'Test'. Below it, a green header bar reads 'View Jobseeker Details'. The main content is organized into a table with four columns:

Full Name	Anuj Kumar	Email ID	anujk@gmail.com
Contact Number	1234567890	Resume	Resume
About Job Seeker			
fdhgjgjyilou			
Profile Pic		Skills	PDO, PHP

At the bottom of the page, the footer contains the text 'Job Portal @ 2020' on the left and 'Crafted with ❤️' on the right.

About Us Page

The screenshot shows the 'Job Portal' application interface. On the left is a dark sidebar with navigation links: DASHBOARDS, JOB CATEGORY, LIST OF EMPLOYERS, REG JOBSEEKERS, PAGES, B/W DATES REPORT, and SEARCH. The main content area has a header 'Update About Us'. Below it is a green bar with the title 'Update About Us'. The page title is 'About us' and the page description is a rich text editor containing the following text:

Our job portal creates an opportunity for both job seekers and organizations to embrace an easy employment process. Users can register for free on this job portal and they can receive different job posting and updates that is related to their career search or their specific field.

As an organization, you can make use of our job portal to post different job openings as well as use them for searching for the most deserving candidates for vacancies. This helps to save time and help streamline the right candidate for a particular job.

Who can use our online job portal?

Our job portal can be used by both organization to post job openings and job seekers to find the job of their choice. Our job portal creates a platform for people seeking for job opportunities as well as corporations seeking best candidates for job openings, to come together.

At www.job-here.com, we are one of the best job sites and we also have provisions that make it possible for them to collect the required knowledge and background of each company or candidate. All the jobs are categorically organized in groups related to each field and industry. Job portals, also known as Career portals have aided numerous job seekers get suitable work and given a boost to their career growth.

So do not hesitate to explore your career opportunities with our job portal and give your career the elevation that you have always been waiting for.

[+ Update](#)

At the bottom, there are two footer links: 'Job Portal @ 2020' and 'Crafted with ❤'.

Contact Us Page

The screenshot shows the 'Update Contact Us' page. On the left is a dark sidebar with navigation links: DASHBOARDS, JOB CATEGORY, LIST OF EMPLOYERS, REG JOBSEEKERS, PAGES, B/W DATES REPORT, and SEARCH. A user profile icon labeled 'TEST' is at the top of the sidebar. The main content area has a green header bar with the title 'Update Contact Us'. Below it are input fields for 'Page Title' (Contact Us), 'Email' (info@gmail.com), and 'Mobile Number' (4454646546). There is also a 'Page Description' section with a rich text editor containing the text 'D-204, Hole Town South West.Delhi-110096,India'. At the bottom is a green 'Update' button.

Employer Report

The screenshot shows the 'Between Dates Report' page. The sidebar is identical to the Contact Us page. The main content area has a green header bar with the title 'Between Dates Report'. Below it are input fields for 'From Date' (dd-mm-yyyy) and 'To Date' (dd-mm-yyyy). At the bottom is a green 'Submit' button.

View between Dates Employer Report

The screenshot shows a web application interface for a job portal. On the left is a dark sidebar with a user icon and the text "TEST". Below it are menu items: DASHBOARDS, JOB CATEGORY, LIST OF EMPLOYERS, REG JOBSEEKERS, PAGES, B/W DATES REPORT, and SEARCH. At the top right is a dropdown menu "Test". The main content area has a title "Employer Between Dates Report" and a green header bar "Employer Between Dates Report". Below that is a table titled "Report from 2020-05-01 to 2020-06-12". The table has columns: COMPANY NAME, CONCERN PERSON, EMAIL, STATUS, REGISTRATION DATE, and ACTION. It contains two entries:

	COMPANY NAME	CONCERN PERSON	EMAIL	STATUS	REGISTRATION DATE	ACTION
1	PHPGurukul	Anuj kumar	phpgurukulofficial@gmail.com	Active	2020-06-02 00:00:00	
2	Apple	John Doe	johndoe@test.com	Active	2020-06-01 00:00:00	

Below the table, it says "Showing 1 to 1 of 1 entries" and has navigation buttons: First, Previous, **1**, Next, Last. At the bottom, it says "Job Portal @ 2020" and "Crafted with ❤".

Candidates Report

The screenshot shows a web application interface for a job portal. On the left is a dark sidebar with a user icon and the text "TEST". Below it are menu items: DASHBOARDS, JOB CATEGORY, LIST OF EMPLOYERS, REG JOBSEEKERS, PAGES, B/W DATES REPORT, and SEARCH. At the top right is a dropdown menu "Test". The main content area has a title "Candidates Between Dates Report" and a green header bar "Candidates Between Dates Report". Below that is a form for entering dates:

From Date:

To Date:

Submit

At the bottom, it says "Job Portal @ 2020" and "Crafted with ❤".

View between Dates Candidates Report

The screenshot shows the Job Portal application interface. On the left is a dark sidebar with navigation links: DASHBOARDS, JOB CATEGORY, LIST OF EMPLOYERS, REG JOBSEEKERS, PAGES, B/W DATES REPORT, and SEARCH. The main area has a header "Candidates Between Dates Report" and a sub-header "Report from 2020-05-01 to 2020-06-12". It includes a search bar, a table with columns FULL NAME, CONTACT NUMBER, EMAIL, STATUS, and REGISTRATION DATE, and a pagination bar showing 1 entry. At the bottom, it says "Showing 1 to 1 of 1 entries" and includes links for First, Previous, Next, and Last.

	FULL NAME	CONTACT NUMBER	EMAIL	STATUS	REGISTRATION DATE	ACTION

Employer Search

The screenshot shows the Job Portal application interface. On the left is a dark sidebar with navigation links: DASHBOARDS, JOB CATEGORY, LIST OF EMPLOYERS, REG JOBSEEKERS, PAGES, B/W DATES REPORT, and SEARCH. The main area has a header "Employer Search" and a sub-header "Result against \"php\" keyword". It includes a search bar, a table with columns COMPANY NAME, CONCERN PERSON, EMAIL, STATUS, and REGISTRATION DATE, and a pagination bar showing 1 entry. At the bottom, it says "Showing 1 to 1 of 1 entries" and includes links for First, Previous, Next, and Last.

	COMPANY NAME	CONCERN PERSON	EMAIL	STATUS	REGISTRATION DATE	ACTION
1	PHPGurukul	Anuj kumar	phpgurukulofficial@gmail.com	Active	2020-06-02 00:00:00	

Candidates Search

The screenshot shows the 'Candidates Search' section of the Job Portal. On the left, there's a dark sidebar with a user icon and the text 'TEST'. Below it are menu items: DASHBOARDS, JOB CATEGORY, LIST OF EMPLOYERS, REG JOBSEEKERS, PAGES, B/W DATES REPORT, and SEARCH. The main area has a green header 'Candidates Search'. Below it is a search form with a placeholder 'Candidate Mobile Number' and a green 'Search' button. A green banner below the search bar says 'Result against "1234567890" keyword'. A table follows, showing one entry: Anuj Kumar (Contact Number: 1234567890, Email: anujk@gmail.com, Status: Active, Registration Date: 2020-03-26 16:09:35). The table has columns for FULL NAME, CONTACT NUMBER, EMAIL, STATUS, REGISTRATION DATE, and ACTION. At the bottom, it says 'Showing 1 to 1 of 1 entries' and includes navigation buttons for First, Previous, Next, and Last. The footer contains 'Job Portal @ 2020' and 'Crafted with ❤'.

Forgot Password

The screenshot shows the 'Forgot Password' page. It features a large background image of a city skyline at night. In the top right corner is the 'JOBPORTAL' logo. Below it, the text 'Don't worry, we've got your back' is displayed in bold. A placeholder text 'Please enter below detail' follows. There are four input fields: 'Email Address', 'Mobile Number', 'New Password', and 'Confirm Password'. Below these fields is a blue 'Reset' button with a circular arrow icon. At the bottom, there's a link 'Sign In'.

CONCLUSION:

The Application was designed in such a way that future changes can be done easily. The following conclusions can be deduced from the development of the project.

- Automation of the entire system improves the productivity.
- It provides a friendly graphical user interface which proves to be better when compared to the existing system.
- It gives appropriate access to the authorized users depending on their permissions.
- It effectively overcomes the delay in communications.
- Updating of information becomes so easier.
- System security, data security and reliability are the striking features.
- The System has adequate scope for modification in future if it is necessary.
